Computer Science graduate with practical experience in web development and AI integration .Skilled in building intelligent applications, including an AI-based clothing customization platform .Proficient in Python, JavaScript, PHP, and MySQL, with strong problem-solving and teamwork abilities.

EDUCATION:

Lahore College for Woman University
Bachelors in Computer Science

Lahore, Pakistan
Graduated in July 2025

Govt Islamia College for Women Lahore Cantt
Intermediate (ICS)

Lahore, Pakistan
2019-2021

PROJECTS:

Canine Defender | Final Year Project

- Developed an AI-based clothing customization platform using MediaPipe Pose, PHP, JavaScript, and MySQL.
- Enabled real-time outfit customization, precise body measurement, and order management through a responsive interface.
- Bridged the gap between traditional men's attire and modern technology with a user-friendly digital tailoring system.

Emotion Recognition from Text (Python)

- Designed a system using Artificial Neural Networks (ANN) to detect emotions by analyzing text input patterns.
- Utilized data preprocessing and word embedding techniques for effective emotion classification.

E-commerce Website (HTML, CSS, JavaScript, PHP)

- Built a dynamic website with integrated front-end and back-end functionality for a complete online shopping experience.

Restaurant Management System (MySQL)

- Created a relational database to manage restaurant operations including orders, reservations, and staff schedules.

Student Portal System (C++)

- Developed a console-based portal using object-oriented programming concepts to manage academic records.

Experience:

MERN Stack Developer Intern — Viion Technology (Current)

- Building full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN stack).

Frontend Developer Intern — Rolustech (3 Months)

- Developed responsive web pages using **HTML, CSS, and JavaScript**.
- Developed responsive websites using **Angular, react.js, next.js, tailwind css, and JavaScript** or different libraries.
- Improved UI/UX by optimizing layouts for mobile and desktop screens and working with real projects.

Skill:

Programming: Python, C/C++, SQLHTML, CSS, JavaScript, PHP

Frameworks/Platforms: Visual Studio, MySQL, XAMPP, DEV C++

Soft Skills: Problem-Solving, Team Collaboration, Time Management, Communication.

Interests: Web Development, Artificial Intelligence, Quality assurance

Language: English, Urdu, hinko, Punjabi.
